SUMMARY

Results-driven Data Analyst translating complex datasets into actionable business insights across healthcare, non-profit, and hospitality industries. Skilled in SQL, Python, Power BI, and Tableau with a proven record of building ETL pipelines, automating reporting workflows, and delivering executive dashboards that improve operational efficiency. Strong collaborator who communicates data-driven recommendations clearly to both technical and non-technical stakeholders.

EXPERIENCE

Data Analyst, MorseLife Health System, FL, USA

August 2025 – Present

- Manage and analyze patient and housing data across PACE outpatient programs and multiple entities using MatrixCare EMR, ensuring accurate and compliant reporting.
- Designed Tableau and Power BI dashboards to track patient outcomes, readmissions, occupancy rates, and care quality metrics for clinical and executive stakeholders.
- Built and optimized ETL pipelines integrating EMR systems, Salesforce, and third-party data sources into reliable analytical datasets.
- Automated reporting workflows using SQL and Python, reducing manual processing time and enabling faster operational decision-making.
- Cleaned, validated, and standardized patient records to support care coordination and regulatory compliance; maintain working knowledge of Snowflake.

Data Management Intern, Help Us Grow (H.U.G), FL, USA

August 2024 – May 2025

- Worked as a data intern for a non-profit organization that helps children improve reading skills. Managed data, created dashboards, and supported over 100+ tutors.
- Used Excel (Power Query, PivotTables, VBA) to automate reporting and cleanse legacy data during CRM migration.
- Developed and deployed 3+ interactive KPI dashboards in Power BI and Amazon QuickSight to monitor tutor performance metrics in real-time, eliminating manual data checks and improving operational efficiency.
- Migrated CRM from Zoho to Salesforce, improving data integrity by 35% and query speed by 50%.
- Supported over 100 tutors by analyzing training outcomes and performance metrics using SQL and Excel.
- Improved account management for 200+ users across multiple platforms (Google Admin Console, Zoho CRM, HUGWeb).

Data Analyst Intern, IC Solutions, INDIA

April 2022 - March 2023

- Built a real-time Power BI analytics dashboard tracking venue bookings, cancellations, and room utilization across multiple hospitality properties, improving event operations.
- Automated data pipelines using Python and SQL to improve reservation accuracy and significantly reduce manual data entry.
- Developed SQL stored procedures for commonly used queries, reducing data retrieval time by 10%.
- Delivered weekly status reports on data pipeline health and business trends to cross-functional stakeholders.

SKILLS

Languages: Python, SQL, C, HTML, CSS

Databases: MySQL, PostgreSQL, Oracle, SQL Server, Snowflake, SSMS

Visualization & BI: Power BI (DAX, Power Query), Tableau, Amazon QuickSight, Looker, Qlik

Tools & Platforms: Salesforce, Talend (ETL), Git/GitHub, Workday, Zoho CRM, Jupyter Notebook, VS Code

Analytics: ETL Development, Statistical & Predictive Analysis, Time Series, Anomaly Detection, EDA

Microsoft Suite: Excel (VBA, PivotTables, Power Query), Word, PowerPoint, Microsoft 365, Teams

Soft Skills: Cross-functional Collaboration, Stakeholder Communication, Data Storytelling, Attention to Detail, Problem Solving

EDUCATION

Master of Science in Data Science and Analytics, Florida Atlantic University, FL (GPA: 3.95 / 4.0)

Bachelor of Engineering in Computer Science, Visveswaraya Technological University, India (GPA: 3.5 / 4.0)

PROJECTS

Emergency Department (ED) Patient Flow Optimization | Excel, SQL, Power BI, DAX

- Analyzed 9,200+ ED visits using SQL and Excel; developed multi-department Power BI dashboards with DAX to track wait times, patient satisfaction, referrals, and peak-hour staffing trends across 7 departments.
- Identified operational bottlenecks contributing to reduced wait times, lower readmissions, and more efficient resource allocation.

Operational TAX and Wealth Management Reporting | Power BI, DAX, Power Query

- Automated a multi-page Power BI reporting dashboard for 5,000+ clients across 8 jurisdictions; identified 1,600+ high-risk clients using advanced DAX, improving compliance monitoring and cutting reporting time.

Vendor & Inventory Operations Dashboard | Power BI, SQL, Python, Excel

- Developed a comprehensive Power BI dashboard with stacked charts, gauges, slicers, and matrices; used DAX and Excel preprocessing to support vendor analysis and inventory decision-making for ABC Corporation.
